## FOR A BETTER AND GREENER WORLD

Every year, about seven million tons of waste are discharged into the world's oceans. Plastic in the ocean is a serious threat to marine wildlife, plant life and entire ecosystems.

Our green planet is gradually deteriorating due to environmental pollution, CO2 emissions and plastic waste. Despite the effect on animals and human beings, this phenomenon is unfortunately increasing.

Many organizations, associations and dedicated volunteers get involved in this cause globally - so does JJDK. With this new collection, JJDK has selected several of our series in which we use a lining made from recycled plastic bottles.

So, when you purchase one of these specially selected JJDK products, you help save the world and support global sustainability.

THANK YOU

JJDK

# SS 2023

## PROVENCE

The new **JJDK** Spring/Summer collection 2023 has been inspired by several trips to this amazing region of France, namely Provence.

Its beautiful lavender fields, lush nature, cozy villages built in fieldstones and its mint green exterior stimulated my creativity and had a great influence on our brand new summer collection.

Many new styles are presented in soft summer materials such as velvet and velour, as well as cotton variations in trendy shades of pastel colors such as lavender and mint.

Sincerely,  
JJDK, Jakob Bredahl-Kjær
